

PROTERRA

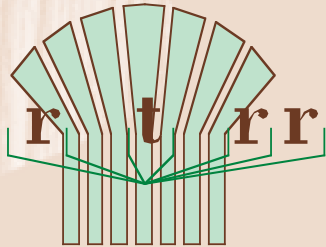

For a natural living

Borrowed from nature for the human - this is the way, furniture shall be understood, produced and treated nowadays. To these demands, based on the experience of our companies founders, who already used the natural products shellac, linseed oil, wood oil, Carnauba- and beeswax to produce internationally well-known surface materials for wood, there is a pretty natural answer: Proterra.

The name stands for a whole range of possibilities for ecological surface treatment. Proterra is a complete oil-, wax- and resin range, whose quality is certified by documents. Produced from reproductive raw materials and tested in a high tech laboratory, these products save existing resources and at the same time create the conditions for a healthy living.

The ecologically oriented Proterra-philosophy considers the complete economic cycle and also includes application and disposal. All products from the Proterra-range can be applied manually and industrially and they are biodegradable.

All Proterra-products were tested and certified regarding their ecological harmlessness by the institute for wood economy in Dresden. This gives the user and his customer the safety, to have an ecologically useful product.

Cera Wax balm GE 100

Cera wax balm is a universally applicable, pasty product for the surface treatment based on natural oil and wax in a low-odour and hypoallergenic adjustment. Cera wax balm is applicable for all treatments of wood in the interior sector. It has a regular and even effect.

Packaging sizes: 0,8/4 kgs

Important advice:

Does not dry by oxidation, for this reason there is no danger of self-ignition.

Hard oil GE 110

Hard oil GE 110 is a low viscosity adjusted oil based on linseed oil with addition of non-lead siccatives.

Packaging sizes: 1/5 litres

Important advice:

Must not be applied together with CN-containing lacquers or stains in the same spray booth. Cotton cloths, which are soaked with oil, may self-ignite. For this reason let them dry spread out at the air before disposal.

Cerol Liquid wax GE 120

Cerol Liquid wax is a low-viscous, odourless oil-wax combination based on linseed oil, bees- and Carnauba wax.

Packaging sizes: 1/5 litres

Important advice:

Must not be applied together with CN-containing lacquers or stains in the same spray booth. Cotton cloths, which are soaked with oil, may self-ignite. For this reason let them dry spread out at the air before disposal.

Cerol Hardwax GE 140

Cerol Hardwax is a pasty oil-wax quality based on linseed oil, bees- and Carnauba wax.

Packaging sizes: 1/5 kgs

Important advice:

Must not be applied together with CN-containing lacquers or stains in the same spray booth. Cotton cloths, which are soaked with oil, may self-ignite. For this reason let them dry spread out at the air before disposal.

Resit Wax resin GS 170

Resit Wax resin is a sprayable surface material for base- and top coating based on shellac, natural oil and wax in fermentation alcohol.

Packaging sizes: 1/5/25 l

Important advice:

Does not dry by oxidation, for this reason there is no danger of self-ignition.

Cleaning agent GR 1900

Proterra Cleaning agent is an agent for cleaning and maintenance of furniture and wooden floors. Suitable for all furniture surfaces, which are treated with natural products or lacquers. Also for floor laminates, PVC, tiles and plastic surfaces.

Packaging sizes: 1/5/10 l
